## **MVSC Continues National Rollout of Government Technology Solution**

**Joseph Nemelka is named President and Chief Operating Officer to lead growth effort**

**AGOURA HILLS, CA – May 10, 2016** – Motor Vehicle Software Corporation (MVSC), the next-generation provider of innovative process management SaaS solutions for state government agencies and businesses, is reinforcing its national leadership position by expanding operations in Oregon, Virginia and Illinois. To bolster this effort, CEO Don Armstrong announced today that Joseph Nemelka has been named MVSC President and Chief Operating Officer.

In his new roles, Nemelka will oversee all the operations of the company, ensuring MVSC continues to scale its operations to support the rapid growth of the company. Nemelka had served as Executive Vice President of Sales and Business Development since 2013. Armstrong, who is relinquishing his role as President, will continue to focus on the growth and direction of MVSC as well as shape future technology and product development.

“Joe has been a leading innovator in eGovernment for more than 20 years. He was part of the original management team at NIC (NasdaqGS: EGOV), transforming it from a small enterprise into a multibillion-dollar, multinational public corporation,” Armstrong said. “As MVSC continues its national growth trajectory, Joe will build upon our current successes and lead our expansion to effectively support our growth.”

MVSC is the leading provider of electronic registration and titling (ERT) software in its home state of California, the country’s largest automotive market. More than 56 percent of all new vehicle franchises benefit from MVSC’s proprietary, award-winning software. MVSC has been successfully competing against large multibillion-dollar competitors like CDK Global (NYSE:CDK) and Dealertrack (Cox Automotive) and is positioning itself to achieve an even greater level of success nationally. Demand from auto dealers, fleet companies, related businesses and DMVs in other states has prompted the company’s expansion.

“When MVSC was founded 10 years ago, there was the goal to reinvent the automotive registration process. MVSC achieved this through the award-winning DMVdesk web-based solution and by building close, personal connections with auto dealerships and DMVs,” Nemelka said. “Our solution has since grown to encompass fleets, credit unions and junk companies, among others. As we grow nationally, we will continue to provide superior, game-changing technology solutions, training and support for our expanding clientele.”

“We’ve accomplished so much,” Nemelka said. “We have expanded operations and training opportunities in Oregon, Virginia and Illinois, and are establishing our leadership position in government technology and eGovernment nationwide. Consequently, we have been rapidly hiring to ensure seamless growth. Furthermore, we are in discussions with additional departments of motor vehicles as well as federal agencies to continue the momentum of enhanced Vehicle-to-Government transactions and communication. In this new role, I fully intend to surpass the expectations of our internal teams, customers and the automotive technology community.”

### **About Motor Vehicle Software Corporation**

Based in Southern California, MVSC is a Vehicle-to-Government (V2Gov) technology firm focused on developing innovative process management SaaS solutions, including electronic registration and titling platforms, in partnership with state government agencies and businesses across the United States. A public-private partner, MVSC’s groundbreaking technology and superior processes have transformed and driven market efficiencies since the company’s founding in 2005. Our products include [DMVdesk](#), California’s No. 1 ERT provider; [Vitu](#), the revolutionary new solution that executes registration and titling across multiple stores on one platform; and the [Registration Management Professional \(RMP\)](#) training program for new and experienced dealership personnel.
